

COMMENTS & OBSERVATIONS ON "LOCKDOWN" PHOTO

WEEK 2

Hi Bill Interesting photo as it shows so much. I can't make out 186 but ex-SL&NCR no. 27 (also RPSI) is visible to the left of the loco shed. One of the (relatively) new EE 70 Class railcars is approaching on the left, in its original (and quite striking) UTA livery. Does anyone know what the steelwork in the bottom right is? Two items look like bridge girders. Best wishes Tim

And Bill replies "Quite correct about No 27 – a static exhibit at Whitehead and no real likelihood of coming back into service as it wouldn't add much to the RPSI fleet. The J15 is just visible top right, perhaps Photo Week 3 will have another image from the shed yard?"

And to save anticipation of next week (and because we have an interesting anniversary to celebrate) here is the hidden J15
