

COMMENTS & OBSERVATIONS ON "LOCKDOWN" PHOTO

WEEK 4

I can't believe this was too difficult! The second photo is J15 196 in the Sligo platform at Mullingar. The occasion was the RPSI Province of Leinster Railtour on Sunday September 11th 2011 visiting Mullingar after a day on trips on the old M&GWR lines out of Dublin.

The first photo was the turntable on the Athlone side of the line, the route no longer in use having been the old mail line to the West. After a struggle the loco was turned and passed the shed, originally the RPSI's southern base. I have just made an O Gauge Alphafix model of a shed. It looks remarkably like Mullingar!
